Phireon

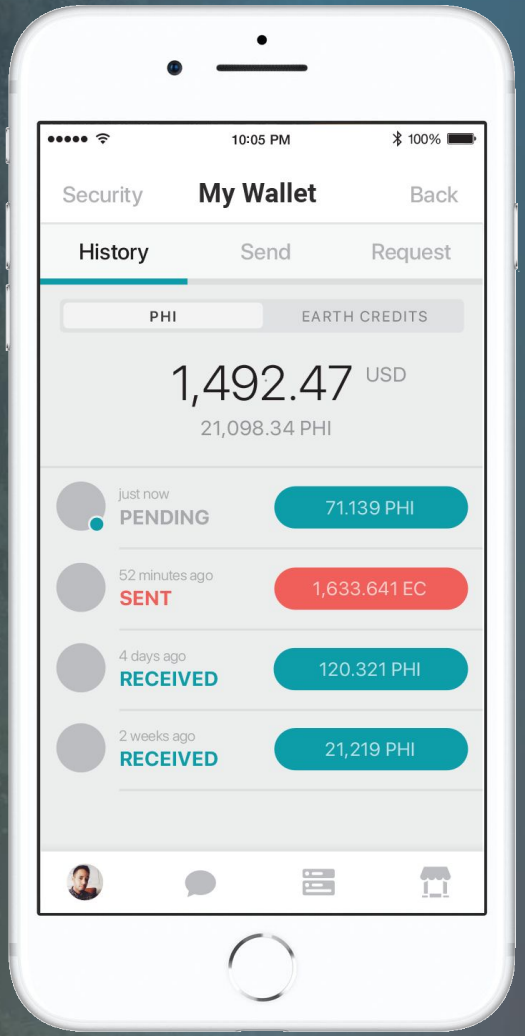
CASHLESS ECONOMIES

- Utilising the latest in cryptographic currency technology, you can manage, maintain, and govern all transactions without hard currency.
- An entire nation's economy can be transparently tracked, measured, and secured using our quantum blockchain technology.
- Hard currency can still be deployed and simply printed on any piece of paper or as a designed credit note from a custom ATM.
- ATM's can also serve as community hubs disseminating information, providing bureaucratic services such as licensing & permits, providing government subsidies, and voting.

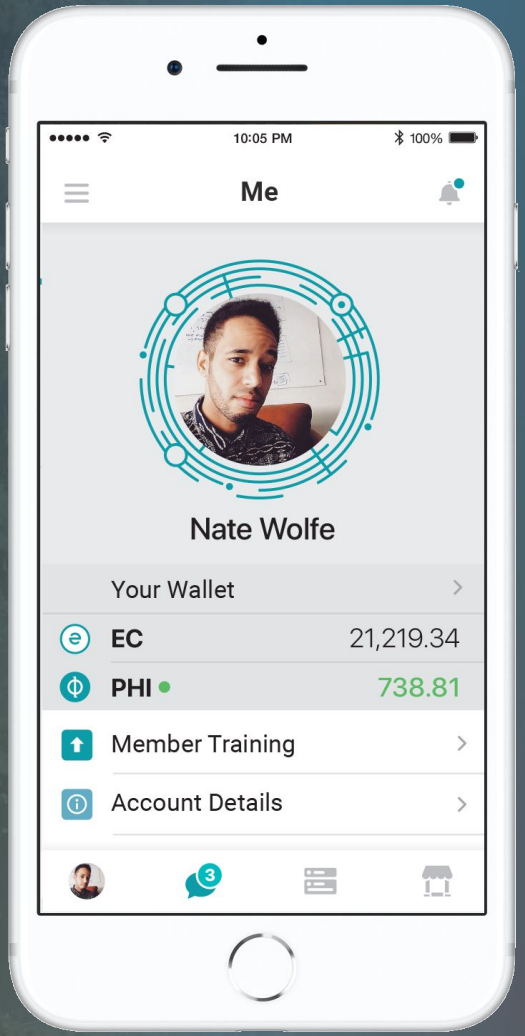


Private Document not for Distribution

Phireon

SECURE ID & WALLET

- Blockchain based cryptographic architecture enables a secure unique ID for all citizens.
- Uses secure embedded data that can include; private personal details, biometric data, or any variable required by the client.
- Secure and unhackable details can be stored replacing the need for personal identification such as passports or driving licenses.
- All bureaucratic systems can be integrated within the system through personal NFTs enabling a wide variety of access levels and automated permissions.
- The spectrum of data is broad and maintains privacy for citizens while providing broad and highly granular data for managing the community .

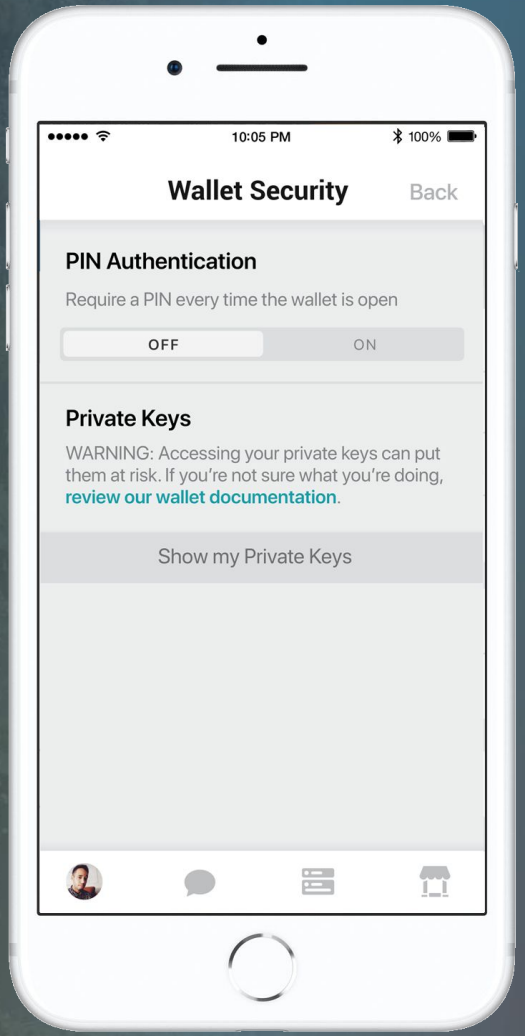


Private Document not for Distribution

Phireon

FRICTIONLESS TAXATION

- Governments or clients will be effortlessly capable of receiving instant tax payments or transaction fees built into every electronic transaction.
- Replaces the bureaucratic burden of employing thousands of tax inspectors.
- Makes tax evasion virtually impossible.
- All tax and transaction fees will be calculated real time and deducted or adjusted as necessary with every transaction.

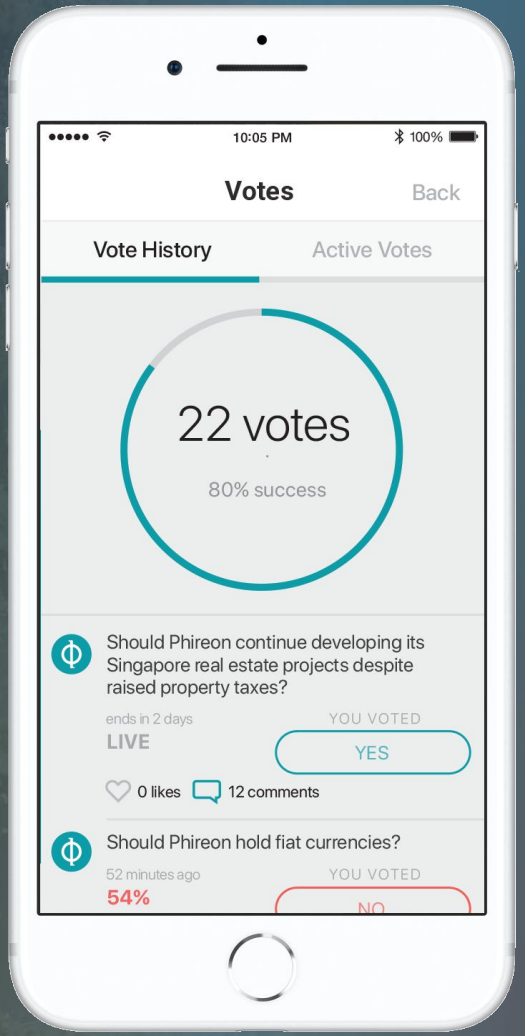


Private Document not for Distribution

Phireon

SECURE VOTING IN REAL TIME

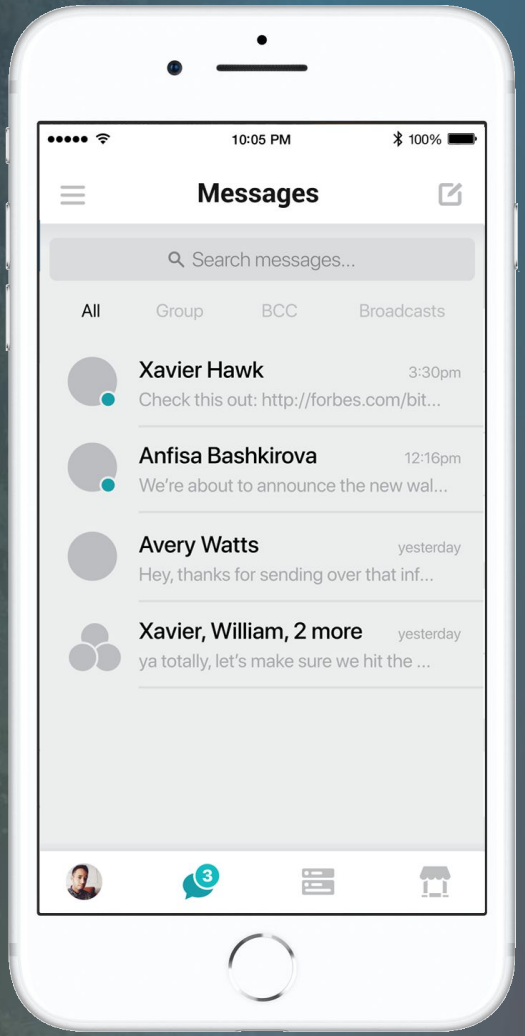
- Nations, governments, communities and local governance will be able to determine the will of the people in real time, securely.
- Enables the population to have a voice at every level of governance from a local community level to a national level.
- National voting systems can be securely employed at a low cost within an environment protected by quantum blockchain technology.
- Votes can be tracked real time with no chance of fraud or backdoor tampering.



Phireon

MASS DATA

- Directly contact every citizen or group without wait and with no bureaucratic waste.
- Embedded is unlimited data on individual and collective transactions providing clients with the data necessary to form policies on a wide range areas of serious interest to governments.
- All governments will have everything they need to properly manage their constituency.
- This is all done while maintaining individual privacy.

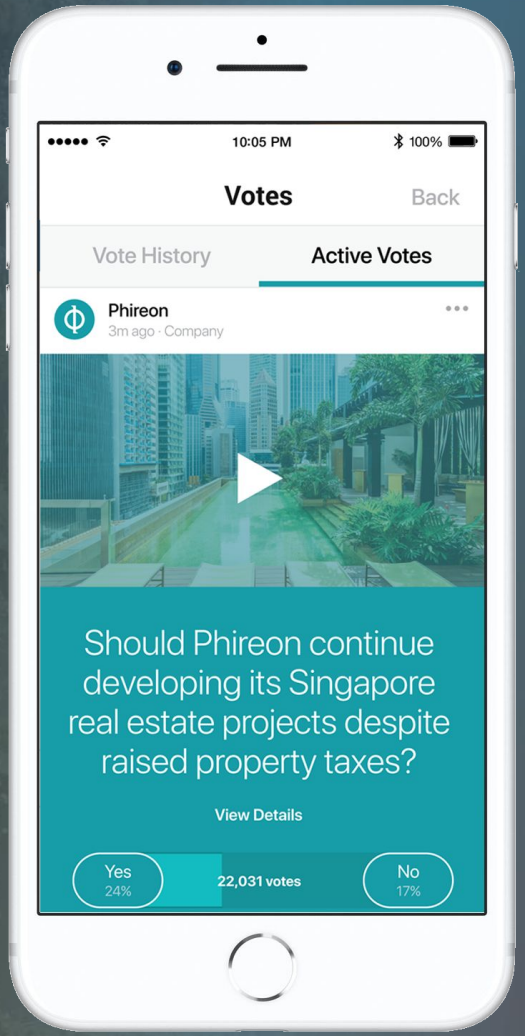


Private Document not for Distribution

Phireon

LICENSES, PERMITS, & TITLES

- Through the use of NFTs (non fungible tokens) Phireon can facilitate Driver's Licenses, Passports, Building Permits, Land Titles, and more which can all be securitized and easily tracked and managed.
- Land Titles can be tracked, managed, securitized and be used to measure the sector and real estate market in real time.
- Citizens can obtain permits and all manner of bureaucratic management tools through the app
- The chain of custody of all licenses, titles, and permits allows for accurate and detailed records to be secure and functional.

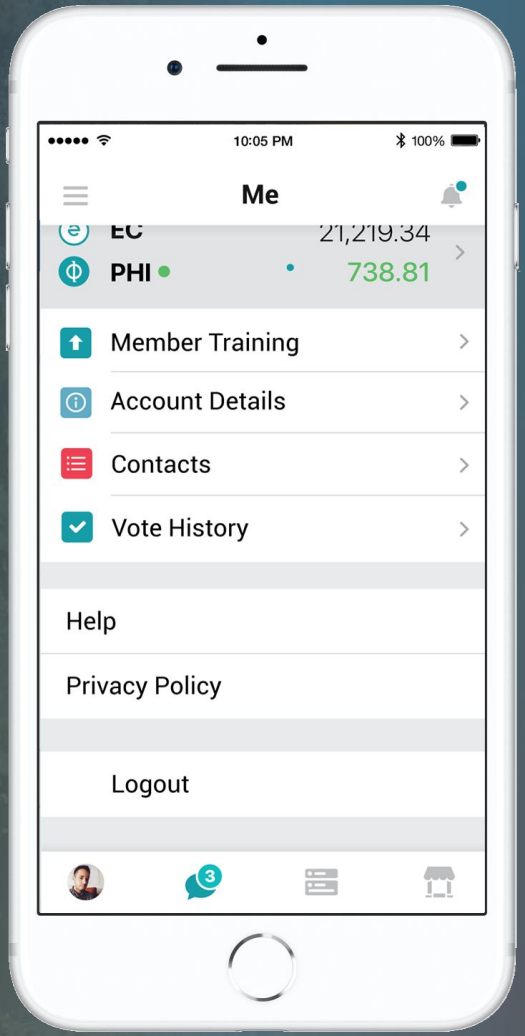


Private Document not for Distribution

Phireon

EDUCATION

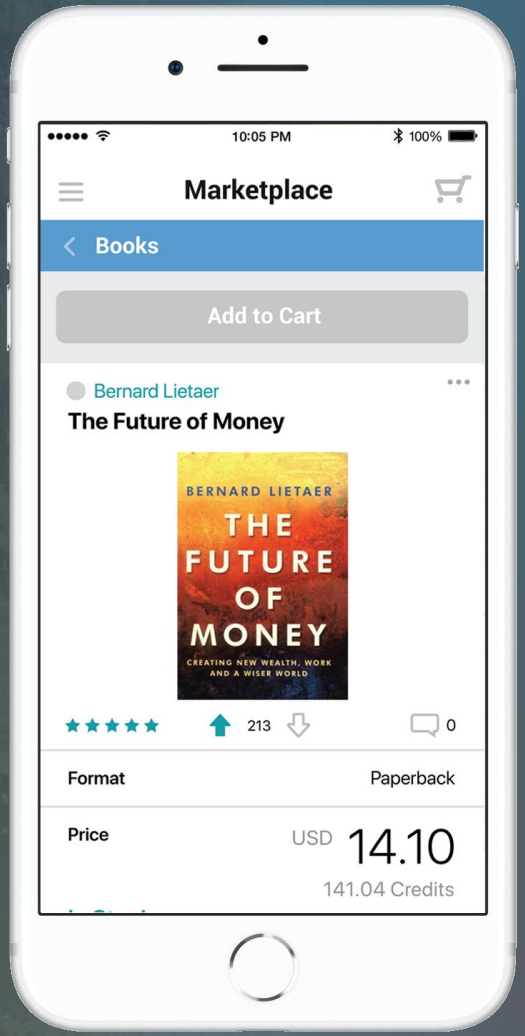
- Built in AI systems allow for personalized citizen education tracks which operate within a larger framework of educational programs.
- Interactive videos, questionnaires, and in person sessions are all managed within the app.
- On going metrics provide customizable tracks for every citizen regardless of education level.
- Each citizen can be educated on all votes and decisions for the community increasing the citizen knowledge base and capabilities.



Private Document not for Distribution

Phireon FRAUD PREVENTION & MICRO LOANS

- Track personal details as well as the entire history of any transaction ever made on the system.
- Every account will be connected solely to a registered individual making everything traceable, trackable, and its users accountable.
- Algorithms flag any unusual transaction or purchase history, creating an environment where it is impossible to launder or gain money via illegal means.
- Small loans can be administered and paid back automatically without the need for loan managers, banks, or human interference.



Private Document not for Distribution

Phireon

UBI

- The technology provides a simple and productive means of providing citizens with basic living wages to offset AI and 3D printing job loss.
- Recent studies have shown across all industries this new industrial revolution is thought to extend to almost 70% of all current jobs.
- To avoid societal collapse, Universal Basic Income will become necessary to fuel a service and entertainment driven economy.
- Phireon solves this problem by involving the citizenry and providing micro payments for their engagement, education, and betterment.

PAYMENT SYSTEMS

PHIREON GLOBAL PARTNERS

OUR PAYMENT SYSTEMS ALLOW USERS TO ENGAGE IN COMMERCE AS THEY ARE USED TO, AND ALLOWS PHIREON TO PROCESS ALL THE TRANSACTIONS OF NUMEROUS CLIENTS ECOSYSTEMS SECURELY AND EFFICIENTLY.

FINAL THOUGHTS

- The technology exists to allow nations, groups of individuals, and communities to create their own bespoke currencies, management systems, and governance solutions.
- Faced with ever increasing uncertainty in the world economy, and the constant threat of a global economic meltdown, governments are increasingly looking towards cryptographic solutions for future economic challenges before the people begin to do it themselves.
- Phireon provides the solutions your governments need to stay relevant and maintain safety and prosperity for your citizens. Above all our system is secure, frictionless, useful, and fun.

THANK YOU
